DETAILED ACTION

This Office Action is in response to the initial filing on February 6, 2004. Claims
 1-21 are currently pending and have been considered below.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 21 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 21 is directed to a "computer data signal embodied in a carrier wave".

Thus, the claim is directed to a computer data signal per se. The Office considers a data signal (or carrier wave) as being a form of energy and, as such, does not fall within any of the four recognized classes of statutory subject matter.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

10/773,496

Art Unit: 3622

4. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Minami et al (6,968,499).

Claims 1, 8, 12, 14, and 21: <u>Minami</u> discloses a system, method, program, and signal for managing content on a virtual store, comprising:

- a. creating a template upon which store web page displays are formatted
 (column 1, lines 13-26; and column 11, line 64 column 12, line 23);
- b. designating one or more e-marketing spots (e.g. banner advertisement locations) in the hosted stores (column 2, lines 5-10);
- c. setting up a marketing campaign for the stores (column 1, lines 37-42 and column 16, lines 14-60); and
- d. creating one or more campaign initiatives (parameters) for the content to be displayed in the stores (column 2, lines 35-51; column 9, lines 16-33; and column 16, lines 14-60).

While <u>Minami</u> discloses creating a template and advertising campaign for a store, it is not explicitly disclosed that they are used for a plurality of stores. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made that the same template and campaigns could be set up and used for a plurality of stores, such as a chain of stores. One would have been motivated to use the template and campaign for a plurality of stores in order to eliminate the need to reenter the same template and campaign data over and over again for a chain of stores.

10/773,496

Art Unit: 3622

Claims 2, 9, 13, and 15: Minami discloses a system, method, and program as in Claims 1, 8, and 14 above, and further discloses creating local campaign initiatives for content to be displayed in the e-marketing spots of the stores (column 2, lines 35-51; column 9, lines 16-33; and column 16, lines 14-60).

Claims 3 and 16: Minami discloses a program and method as in Claims 2, and 15 above, and further discloses modifying the local campaign initiatives in the store (column 10, lines 33-35).

Claims 4, 10, and 17: Minami disclose a system, method, and program as in Claims 2. 9, and 15 above, and further discloses scheduling a time duration (schedule) for the content display (column 9, lines 16-33).

Claims 5, 11, and 18: Minami discloses a system, method and program as in Claims 4, 10, and 17 above, and further discloses checking for schedule conflicts between the campaign initiatives (column 9, lines 16-33; column 14, lines 5-24; and column 15, lines 15-19).

Claims 6 and 19: Minami discloses a program and method as in Claims 5 and 18 above, but does not explicitly disclose choosing the campaign initiative over the local campaign initiative when a schedule conflict occurs. However, the Examiner notes that the decision of which advertisement (campaign initiative) would have priority would be

Application/Control Number:

10/773,496

Art Unit: 3622

up to the operator of the system. If only one advertisement could be shown, then the operator would have two choices - show the local advertisement or show the other advertisement. Official Notice is taken that such decisions are old and well known within the advertising arts. For example, for at least several decades, local television stations have routinely substituted local advertisement spots for nationally broadcast advertisements. They have also routinely substituted regional or national alert messages in place of local advertisements/programs. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made for the operator in Minami to select the local campaign initiative over the (system) campaign initiative. One would have been motivated to choose the local campaign initiative over the other campaign initiative in order to allow the store to insert last-minute advertisements, such as manager's specials.

Claims 7 and 20: Minami discloses a program and method as in Claims 1 and 14 above, and further discloses modifying the campaign initiatives in the store (column 10, lines 33-35).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

10/773,496 Art Unit: 3622

- a. <u>DiFranza</u> (5,955,710) discloses a system, method, program, and signal for using a template to set up and distribute Internet advertisements on display screens in a plurality of elevators.
- b. <u>Lewis</u> (7,120,592) discloses a system, method, program, and signal presenting advertisements in a variety of virtual stores.
- c. Ozer et al (7,136,871) discloses a system, method, program, and signal for selectively displaying advertisements based on scheduling and display frequency.
- d. <u>van der Riet</u> (7,158,943) discloses a system, method, program, and signal for building and managing retailer presentations using templates for defining the display parameters.
- e. <u>Lee et al</u> (7,313,622) discloses a system, method, program, and signal for segmentation and presentation of content online marketing campaigns using HTML templates.
- f. Evans et al (7,315,983) discloses a system, method, program, and signal for creating advertisements using a template database.
- g. <u>Westrope</u> (WO 01/29716 A2) discloses a system, method, program, and signal for designing and implementing an advertising campaign using templates, scheduling parameters, etc.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James W. Myhre whose telephone number is (571) 272-6722. The examiner can normally be reached on Monday through Thursday 6:00-3:00.

10/773,496

Art Unit: 3622

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eric Stamber can be reached on (571) 272-6724. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
